## VermiCompost References

Each single module produces:

	Cu.Ft	Gal.	Yards	Lbs.
Per Week	3.6	27	0.13	120
Per Month	15.5	115	0.6	500
Per Year	186	1,400	7	6,100

*Each module produces one-half yard or more per month.  
Add feedstock at about 1-1/2 times the rate of harvest.*

### **Bulk Measures of Vermicompost: (Approximate, easy to remember)**

5 gal (bucket) = 22 lb

1 cu.ft = 7.5 gal

1 yard = 200 gal

### **Pre-composting notes:**

4Hx4Wx4D container = holds over 2 cubic yards

*One horse = 1 yard of manure+bedding per month*

*Food scraps will reduce by half*
